## PRODUCT EXPERIENCE

### KCLS COMBI LIGHT SYSTEM

**IT** Quando una struttura in acciaio inossidabile e un frontale in acetato si combinano insieme, otteniamo Comby Light System: una sintesi perfetta di leggerezza e resistenza. Ovviamente senza dimenticare lo stile.

**EN** When a structure in stainless steel and a face in acetate are combined, we get Comby Light System: a perfect blend of lightness and resistance. Naturally, without ever forgetting style.

### KNIL NATURAL INJECTION LIGHT

**IT** Elevata resistenza all'urto, alle condizioni ambientali e agli agenti chimici: è solo una delle sorprendenti caratteristiche di Nil, il tecnopoliomer esclusivo di Look. Un prodotto all'avanguardia destinato alla realizzazione di prodotti leggeri e ipoallergenici.

**EN** High crash resistance, as well as high resistance to environmental conditions and chemical agents: these are just some of the surprising features of Nil, Look's exclusive techno-polymer. An avant-garde product used to make lightweight and hypoallergenic products.

### KSNF SENSY FIT

**IT** Cosa se ne fanno i bambini delle alette se non fanno volare? Sensy fit è il ponte ergonomico di look, ideato per l'appoggio dell'occhiale su viso. Niente più il fastidio delle due alette sul naso, niente più allergie o eritemi. Pronti al decollo!

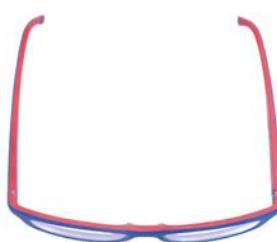

**EN** What do children do with wings if they don't make them fly? Sensy Fit is Look's ergonomic nose bridge, conceived for where the glasses sit on the face. No more irritation from the two wings on the nose, no more allergies or rashes. Ready for take-off!

### KK2.OS K2X COVERING SYSTEM

**IT** K2X Overing System è un rivoluzionario processo di bi-iniezione, grazie al quale abbiamo abbinato due materiali diversi fondendoli in un'unica struttura molecolare. Il risultato è un mix qualitativamente eccellente, che conferisce al prodotto elasticità diffusa e comfort di calzata. Un unico materiale, tanti nuovi pregi.

**EN** K2X Overing System is a revolutionary bi-injection process, thanks to which we combined two different materials, merging them into a sole molecular structure. The result is a qualitatively excellent mix that lends the product overall elasticity and comfort of wear. A unique material, many new virtues.

# PRODUCT EXPERIENCE

## KLHS LOOK HINGE SYSTEM

**IT** Look Hinge System è un sistema esclusivo di chiusura ed apertura della montatura che punta sul materiale per dare una risposta a uno dei principali punti critici della montatura. Con il sistema LHS, 4 volte più resistente all'usura dei materiali normalmente utilizzati, non è più necessario lubrificare o registrare periodicamente le cerniere. Stesso grado di scorrevolezza per una vita più semplice.

**EN** The Look Hinge System is an exclusive system for opening and closing the frame that counts on the material to resolve one of the main critical points of the frame. With the LHS system, 4 times more resistant to wear than the materials that are normally used, there is no need to periodically lubricate or calibrate the hinges. The same degree of fluidity for a simpler life.

## KAFT AIR FIT

**IT** I tuoi occhi e la tua pelle staranno meglio, grazie alla tecnologia Air Fit. Le nanosfere agevolano il flusso d'aria generato dalla sudorazione, eliminando il micro clima che si forma fra l'occhiale ed il vostro viso. Niente più pelle sudata o screpolata nella zona oculare, niente più occhi arrossati, niente più naso irritato, niente più occhiale che scivola verso il basso. Basta pensieri, goditi il sole!

**EN** Your eyes and your skin will feel better, thanks to the Air Fit technology. The nanospheres facilitate the flow of air generated by perspiration, eliminating the microclimate that forms between your glasses and your face. No more cracked or sweaty skin in the eye area, no more red eyes, no more irritated nose, no more glasses that slide down. No more worries, enjoy the sun!

## KALM ALUMINIUM LIGHT MIX

**IT** Prendiamo due elementi abbondantemente presenti in natura, l'Alluminio e il Magnesio, e creiamone una lega: ne risulta un materiale leggero, amagnetico, atossico, resistente alla corrosione e caratterizzato da grandi proprietà meccaniche. Non solo: questo materiale può essere riciclato all'infinito, senza perdere le sue caratteristiche e potenzialità. Un materiale nuovo.

**EN** Let's take two elements that are found in abundance in nature: Aluminium and Magnesium, and let's create an alloy: the result is a light, non-magnetic, non-toxic material that is resistant to corrosion and distinguished by great mechanical properties. Not only: this material can be recycled infinitely, without losing its characteristics and potential. A new material.

## PRODUCT EXPERIENCE

### HHG

**IT** Helios Hercules Glass, la nostra lente, è costruita con il materiale più nobile: il vetro ottico. Helios Hercules Glass è infrangibile, indeformabile, antiriflesso e cromaticamente perfetta. Sempre nitida anche nelle zone periferiche, HHG è trasparente e pulita anche in condizioni impegnative. Le nostre lenti sono testate attentamente fra le Dolomiti: qui nasce ogni nostra idea e prodotto. La natura, l'altitudine e le pareti rocciose sono fedeli alleate dei nostri test. Perché ogni giorno merita una visione superiore.

**EN** Helios Hercules Glass, our lens, is made from the most noble of materials: optical glass. Helios Hercules Glass is shatterproof, crushproof, antireflection and chromatically perfect. Always clear, even in the peripheral areas. HHG is transparent and clean, even under demanding circumstances. Our lenses are carefully tested in the Dolomite area: it is here that all our ideas and products are born.

Nature, altitude and rocky walls are faithful allies to our tests. Because each day deserves higher vision.

### K1.OS

**IT** Kx1 Oving Sistem è la tecnologia di Look che prende spunto dai più piccoli. In Kx1 Oving Sistem c'è la tenacia e la plasticità di un bambino che vuole scoprire il mondo. K1.OS consente l'inserimento di un'anima in acciaio ad elevata memoria di forma all'interno di sottili lamine di gomma. Il risultato? un materiale sottile, ipoallergenico, atossico, elastico, resistente al tempo, al sole ed amico dell'ambiente. Un materiale grande pensato per i piccoli.

**EN** Kx1 Oving System is the Look technology that takes its cue from the littler ones. Kx1 Oving System contains the tenacity and the plasticity of a child who wants to explore the world. K1.OS makes it possible to insert a steel core with high shape memory into thin sleeves of rubber. The result? A thin material that is hypoallergenic, non-toxic, elastic, resistant to time and to the sun and a friend to the environment. A big material conceived for the little ones.
