LA TECHNIQUE-FAIRE-FOLIE DU MODERNISME

frame - border - lunettes - psychedelic

The concept of a design involves its inner and outer workings, and at the same time the framework of its inside and outside should be seen explaining its function with as much visual appeal. With that in mind, We try to express ourselves through the design of the frame of the eyewear. As a tool for vision, and as well for fashion, it shouldn't give any discomfort: it should feel snug and secure, a feeling similar to a person's embrace. Most importantly, it should be dependable, a tool we can all trust and rely on every day. Also, through utilizing its designs and styles, eyewear is a tool of expression and serves as a fashion statement of oneself. There should be a harmonious match according to the fit and needs of the wearer, boosting self-esteem of how the person feels inside, and naturally helping to visualize the person's internal and external expression positively.

Dreamcatcher Eyewear was founded in 2010 in Toronto representing unique and graceful eyewear designs. The foremost step was creating a design and brand that would be appealing and attractive to all Canadians. We found inspiration from the "Dreamcatcher" hoping to also catch the hope and dreams of Canadians as well. The Dreamcatcher talisman is deeply rooted in Canadian tradition. It has powerful and spiritual meaning and its inspiration is drawn to the manufacturing of our eyewear.

The same craftsmanship that goes into the dreamcatcher, like its many threads forming intricate web patterns, goes into the manufacturing of the eyewear. Moreover our designs are inspired and modeled from the delicate designs of the dreamcatcher such as its feathers and unique patterns. This quality of work and design help us to stand out and be apart from the many other brands. What this amounts to is a Canadian brand with an eyewear that is built with creative and ingenious designs, high in quality and practicality, and when worn feel light and comfortable.

After the launching of Dreamcatcher Eyewear, we expect widespread popularity of the eyewear that draws its motif from the dreamcatcher of Canada. Furthermore, we plan to keep the momentum going beyond Canada's borders and rapidly expand internationally to receive global recognition as a global eyewear brand.

What struck to us was realization of the potential for a Canadian eyewear brand to make a huge hit, following unique designs, using unique materials, as eyewear frame designs started to be more trendy and fashionable.

This opportunity is not limited to simply eye glasses, but also through the designs of sunglasses, cases, bags, etc. enlarging the overall bigger picture.

Also, we continuously research in our field to lead in the areas of technicality, creativity and trends to become the leader of the eyewear market. Through all this, we strive to make designs only Dreamcatcher Eyewear has to differentiate ourselves from the rest.

Technique Facteur

Eye-glasses are small in size. To that extent delicate materials and workmanship are needed in its creation. Of only 1mm of change difference in design, a person's facial expression can also be changed. We continuously strive to create better eyewear of delicate design and technicality

création Facteur

Out of all the various eyewear brands, we aim to be original in design with quality materials serving as a strong base foundation while keeping the person in mind who will wear it when designing, and to have the freedom to pursue timeless creation.

se Propager / Tendence

There is common aspiration here at Dreamcatcher Eyewear that can be found. It involves work with happiness, and consecutively creating new and original designs as a final result. We at Dreamcatcher Eyewear look forward for new opportunities, never forgetting the importance of trends, having the freedom to create, escaping our personal framework to think outside the box and to create new trends ultimately.

Much like the Canadian dreamcatcher, we aspire to create a timeless instrument of uniqueness and beauty. Thus Dreamcatcher Eyewear will become a symbol that cherishes the classical and elegant beauty of the dreamcatcher. As the dreamcatcher has kept its appearance through the ages of time, our commitment to our overall vision will follow suit as well.
